

St Marys Community Points of Interest App

For Apple (iOS) devices

1 Download the App

Go to the App Store and search for "Collector for ArcGIS."

Download and install the App

2 Opening the App for the first time

When opening the app for the first time, select "ArcGIS Online." You will then be prompted to Log In.

Collector for ArcGIS

ArcGIS Online

Portal for ArcGIS

Note: you should only have to complete steps 1 and 2 the first time you open the app.

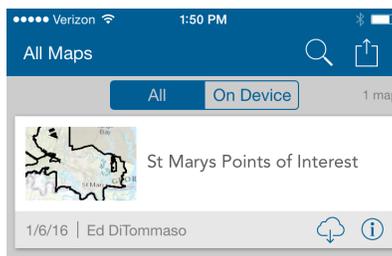

3 Access the map

Enter the following:

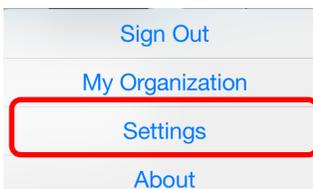

Username: **stmarysga**

Password: **stmarys1**

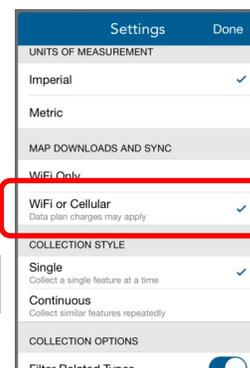

Touch the "St Marys Points of Interest" project to Open the Map

Confirm that your device is setup to collect data using cellular data

Make sure "WiFi or Cellular" is checked. Click done.

If you run into trouble submitting a point, revisit this step and ensure that "WiFi or Cellular" is checked.

4 Using the App

Allows you to turn on/off GPS location functionality

Use this tool to add a new Point of Interest

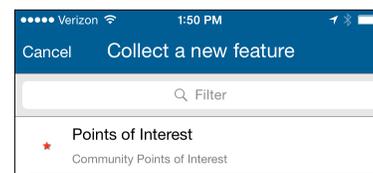

Allows you to toggle between different basemaps. For instance, you can use a street map or an aerial map

5 Add a new Point of Interest

Click the "plus" to add a new feature and complete the form.

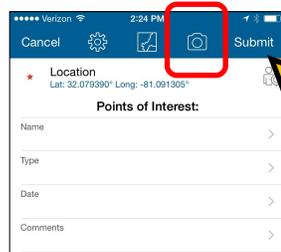

6 Attached a photo

Camera Tool

Select the Camera tool to take a picture. The picture will be linked to the point collected.

Once you have completed the form and taken a picture (if desired), click the "Submit" button to record your Point of Interest
