City of St. Marys Planning and Building Department

VEHICLE PARKING SURVEY DOCUMENT

Prepared by the Planning Department Staff as directed by City Council

This is a check off listing of items that **could** be included in a proposed ordinance. A Check in the large box will indicate a desire to put this item (in more formal written language) into a proposed Vehicle Parking ordinance. Please ADD comments as appropriate to either expand on your choice or provide additional information. There is a section at the end to propose additional items that should be considered for inclusion.

The K SM CO column is for reference to the various municipalities' CURRENT ordinances that address the clauses that were listed in the prior report/ordinance. A filled in square indicates that that particular municipality addresses this. An unfilled in square indicates that – to the best of my knowledge - there is no ordinance that addresses the parking issue.

NOTE: The use of the word 'setback' is a legal definition for the land area between the property lines and the closest any structure can be built to the property line. Depending on the zoning, the distances for the setback will be different.
